POSTAL PATRON

Why Press Ganey Surveys are Important

At Iowa Specialty Hospital, we recognize that our patients are the most valuable part of our healthcare team. For this reason, we partner with an outside company, Press Ganey, to conduct patient satisfaction surveys and collect the results. These surveys are an important tool for our facility, as we are intent on improving each patient's healthcare experience.

A patient satisfaction survey can accurately capture the patient's perspective about their entire care experience. By analyzing data from these surveys, we can identify issues and areas of concern. A team of our facility leaders and healthcare providers meets regularly to brainstorm improvement solutions based on what our patients are telling us through these surveys.

We ask that you please complete any and all Press Ganey surveys that you receive from Iowa Specialty Hospitals and Clinics. By doing so, you are giving us the unique opportunity to hear from you on what we are doing well and what we can improve upon. This allows us to continue to grow as an organization and make the next patient's experience even better!

Patient feedback on how we can improve is important, but positive feedback on what we are doing right proves just as valuable. This helps us to know what we are doing well for continued quality service. We also use positive feedback to reward and recognize our dedicated staff. Positive feedback also works to help us remain competitive in the marketplace and recruit quality providers. All of which feeds into our mission to provide an exceptional healthcare experience.

We want our patients' voices to be heard, and we are listening! ■

Your Feedback is
music to our ears!

You may receive a Press Ganey survey by mail or e-mail about your time with us. Please use this opportunity to tell us what we did well, and if we have areas for improvement. We consider you a part of our team and value your input. If you have any questions, please ask us.
